Ingenious Champion Profile

David Kotlerewsky – Field Chief Technical Officer,
EVOTEK, Inc.

Juniper Champion

Introducing David Kotlerewsky

David Kotlerewsky has over 20+ years of experience across a broad range of networking and security solutions. As Field CTO, he leads a team in pre-sales activities and complex network implementations in California, Arizona, and Nevada. He also works with select customers throughout the United States and with clients with global presence. David has architected, designed, engineered, deployed, and supported complex networking projects for global enterprises, service providers, and cloud operators. EVOTEK is a leading integrator of IT solutions, infrastructure, and services for the cloud ecosystem (public, private, and hybrid), service providers, and enterprise customers. The company is a newly minted Juniper Networks Elite Partner, and is a rising star within Juniper's partner community.

Career Path

David started his career as a network engineer building and supporting LAN and WAN environments for fast growing technology companies, which included a national ISP, an Internet search engine, and various online Web 2.0 companies. He joined EVOTEK in 2016 as a Field CTO and has been instrumental in the company's effort to become a Juniper Elite Partner. His expertise now covers enterprise LAN/WAN, data centers, ISP infrastructures, security, and application delivery solutions. His knowledge of and experience with Juniper has enabled him to help EVOTEK's customers solve complex business challenges through the use of various Juniper technologies.

Engaging with Juniper

David first became familiar with Juniper while employed as a network engineer at an Internet search engine, working with the Juniper Networks® M Series Multiservice Edge Routers and ISG Series Integrated Security Gateways. He had tremendous success early on with Juniper Networks Junos® operating system, which enabled him to be much more efficient working with remote sites and data centers. David has attained numerous Juniper certifications, including JNCIP-SP, JNCIP-ENT, JNCIS-SEC, and JNCDS-DC.

Proud to be an Ingenious Champion

David started down the path of Ingenious Champion to be better positioned to deploy and support Junos OS and Juniper solutions. The program has given him a better understanding of Juniper's product capabilities and the same level of access to product information as Juniper's own engineers. Having this knowledge and level of access has made David more confident and effective building networks with Juniper solutions that meet customer business requirements. David recommends that any engineer who meets the requirements participate in the program. EVOTEK currently has two Ingenious Champions on staff, including David.

On a Personal Note

David loves to spend time with his wife and two young children. In his spare time, he enjoys traveling, doing home improvements, and being a "foodie."

Quotes and Testimonials

Bill Kine, Juniper consulting engineer, says: *"When David calls Juniper, you know that it will be a challenging question! He knows our solutions, especially the large data center platforms, every bit as well as any of our own engineers. He applies his well-honed technical skills to find creative networking and security solutions for his customers. Additionally, David does not hesitate to tackle onerous interoperability challenges. In short, he is a true Juniper Champion!"*

About Juniper Networks

Juniper Networks is in the business of network innovation. From devices to data centers, from consumers to cloud providers, Juniper Networks delivers the software, silicon and systems that transform the experience and economics of networking. The company serves customers and partners worldwide. Additional information can be found at www.juniper.net.
