Authorized Support Services Partners—2024

Juniper Elite/Select partners with the Support Services specialization possess local knowledge and resources along with the technical expertise and dedication to drive excellence for all customer networking, AI and data solutions. Juniper Support Services Partners make a significant investment in service infrastructure, people, tools, education, certifications, and labs.

Juniper Support Services Partners deliver their own unique brand of technical support and services to the customer, enhanced by leveraging Juniper's support infrastructure, the Juniper Networks Technical Assistance Center (JTAC), and special Juniper service and support offerings available only to Juniper Support Services Partners.

Typical activities that Juniper Support Services Partners can deliver include, but are not limited to:

- Creating solutions for complex, mission-critical, multivendor environments
- Architecting, installing, and supporting an integrated Juniper solution
- Providing value-based proactive and preemptive services
- Offering a deep menu of technical talent and resources
- Using an automated call handling and case handling system

The value that Juniper Support Services Partners can deliver includes, but is not limited to:

- Interoperability and back-end connectivity; experts in compliance and risk mitigation
- Localized high touch capabilities for problem resolution, fastest dispatching of the onsite engineer
- Local parts sparing to maintain specific service-level agreements (SLAs)
- Asset tracking and management, and configuration backup via CRM systems

About Juniper Networks

Juniper Networks brings simplicity to networking with products, solutions and services that connect the world. Through engineering innovation, we remove the constraints and complexities of networking in the cloud era to solve the toughest challenges our customers and partners face daily. At Juniper Networks, we believe that the network is a resource for sharing knowledge and human advancement that changes the world.

We are committed to imagining groundbreaking ways to deliver automated, scalable, and secure networks to move at the speed of business.
