Known Issues | 1

Resolved Issues | 2

Introduction

Paragon Active Assurance is a programmable test and service assurance solution using software-based and traffic-generating Test Agents, easily used and delivered from the cloud as a SaaS solution or deployed on-premise in NFV environments.

These release notes accompany Release 4.2.1 of Paragon Active Assurance Test Agent. This release is a bug fix release and therefore does not contain any new features.

Build number:

- Test Agent Application 4.2.1.47
- Test Agent Appliance 4.2.1.60

NOTE: The 4.2 Test Agent packages require version 4.2 of Control Center.

These release notes are available on the Paragon Active Assurance Documentation Web page at https://www.juniper.net/documentation/product/en_US/paragon-active-assurance.

New and Changed Features

There are no new features in this release.

Deprecated Features

There are no deprecated features in this release.

Known Issues

- PAALS-354: Configuring a large number of interfaces (40+) using Confd takes about 20% longer in Release 3.4 (Control Center and Test Agent) than in Release 3.3 (Control Center and Test Agent).

Resolved Issues

This section lists issues that are resolved with this release.

- PAALS-1562: Test Agent crashes when you add, remove, or modify VLANs.
