YEAR 2000 NOTICE

Juniper Networks hardware and software products are Year 2000 compliant. Junos OS has no known time-related limitations through the year 2038. However, the NTP application is known to have some difficulty in the year 2036.

CHAPTER

Statement of Volatility

Statements of Volatility for Juniper Network Devices

A *Statement of Volatility (SoV)*—sometimes known as *Letter of Volatility (LoV)*—identifies the volatile and non-volatile storage components in Juniper Networks devices, and describes how to remove non-volatile storage components from the device.

> **NOTE**: Individual FRUs do not have separate SoV or LoV documents. They are covered in the SoV or LoV of the Juniper Networks device in which they are installed.

> **NOTE**: Statements of volatility are not available for all Juniper Networks devices.
