Data Center Assurance Compatibility

The following table lists the validated Juniper Apstra Edge, Juniper Apstra, and Docker version for the latest Edge version (0.16.5). Apstra 5.1.0 ships with Edge 0.5.0, but 0.16.5 is the latest and only version available for download.

For more information about the following features of Data Center Assurance, see the [Data Center Assurance User Guide](#).

Juniper Apstra with 5.1 and Edge 0.16.5 support the following features:

- [Marvis AI Assistant for Data Center](#)

- [Impact Analysis](#)
- [Service Level Expectations](#)

The following table shows compatibility for legacy version of Apstra Edge. These versions are still supported, but are not available for download and do not support the latest DCA features.

If you are using a legacy Apstra version, you can upgrade your Edge version to 0.16.5 to use the latest features.
